SUMMARY:

Our programming fundamentals project is about Student Management Record. This idea is help full for teachers to manage students record. Teacher can update marks of students on one click. Our project totally based on c++ language.

DESCRIPTION:

Student Management Record Program is a software application designed to help educational institutions streamline and manage their student records. The program allows schools to store and access student records easily. It can generate reports on various aspects of student performance.

PSEUDOCODE:

START

//Define variables

Int roll no array

Int section array

Int course code array

Int GPA array

Int marks array

//Print program introduction

PRINT "Welcome to the student management record program!"

//Get student information

INPUT studentID

INPUT major

INPUT GPA

//Store student information

SET major = INPUT

```
SET GPA = INPUT
//Calculate student GPA
CALCULATE GPA
//Print student information
PRINT "Student Name: " + firstName + " " + lastName
PRINT "Student ID: " + studentID
PRINT "Major: " + major
PRINT "GPA: " + GPA
//End program
END
```
